

Heatmiser IQ

Single Zone Optimiser

IQ+

Number of zones	1
7 day time clock	•
Self learning optimiser	•
Manual summer fan	•
Frost protection	•
Security coding	•
Override facility	•
Constant fan facility	•
Back-lit display	•
Service warning	•
Built in sensor	•
Heater lockout & reset	•

Optimisation

The IQ offers optimisation. A system whereby the control automatically calculates the turn on time to ensure the building is up to temperature for the programmed switching time.

Summer Fan

The IQ offers summer fan facility. This is used to give ventilation during the summer months. A single key press enables the summer function.

Constant Fan Facility

Constant fan is used to control destratification fans.

The output is active throughout the heating program settings.

Security Coding

The IQ offers security coding to prevent unauthorised alteration of the system.

Back Light Display

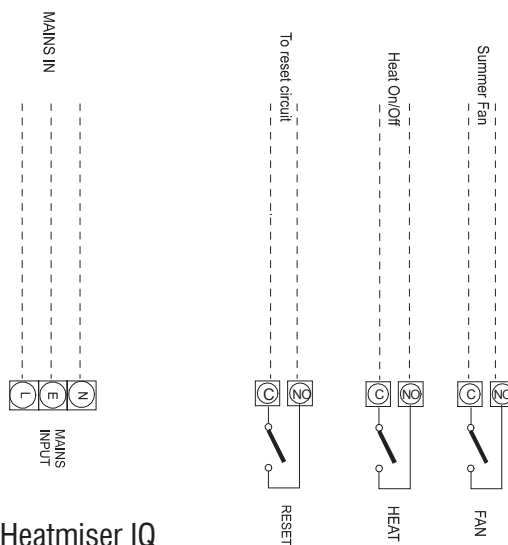

The display lights up when any key is pressed, this makes the display easy to read in poor lighting conditions.

Built in Sensor

The IQ includes a built in sensor, reducing installation time.

Heater lockout & reset

The IQ features heater lockout and reset for use on heaters with electronic ignition.
