

Specialists in the design and manufacture of equipment for climate control using the very latest air induction technology

Dravo have gained over 50 years of specialised knowledge and experience in air handling equipment. We have a reputation second to none for producing the most cost effective and energy efficient system for either heating, cooling or ventilating today's modern buildings. Air induction systems are our speciality. We design and manufacture the right equipment to suit any given application from warehouses to supermarkets, distribution centres, sports arenas, factories and exhibition halls.

Our equipment has been specified and is in use by many of the country's leading companies such as IKEA, Land Rover, Ford, Jaguar Cars, Caterpillar, IBM to name but a few.

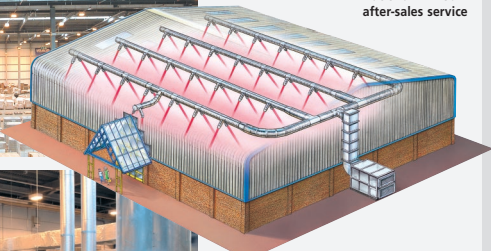

A choice of highly efficient outlets are available

Dravo can offer you all these advantages

- Manufacture
- Free surveys
- Free system design
- Full Installation
- Commissioning
- National 24 hour after-sales service
